

### Tr-3: Trip to Jamaica, August 25-29, 1969

Harlan's notes were recorded in a 4"x6" notebook for the "Plant Breeding Symposium, sponsored by Iowa State University, Ames Iowa, March 1-5, 1965". Harlan had printed in large letters across the top "NOTES ON JAMAICA / 8-25 – 8-29 1969"

Now, we have to be careful, because there might be notes from the 1965 symposium in this book also.

On the inside cover of the notebook is: "Vandermark 208 Veg Crops". Then, at the top of the first real page it has the date: "Aug. 25, 1969". Therefore, we can conclude that Harlan was just using this notebook to record his notes for the Jamaica meeting in 1969 and nothing here has anything to do with Iowa State Univ. in 1965. I am going to guess and say that he had planned on going to Iowa State in March of 1965, and they sent him a notebook, but he did not go.

The next line is

To Kingston

Randy Boggess Forestry

Bill Lukman Entomology

Met George Wilson + later Dr. Lewis

The rest of this notebook contains all manner of notes: some of people, some of descriptions of housing opportunities, others were lists of plants – 7 pages in all, leaving many more pages blank. I do not think it is worth my while to try to transcribe this notebook. There does not seem to be much here of import.
